**Re: Carstab Corporation (Morton International, Inc.) On-Site Assessment
OHD 000724138**

Dear Mr. Schaff:

The purpose of this letter is to follow up on several items discussed during the site reconnaissance visit at the Morton International, Inc. (Morton) facility by PRC Environmental Management, Inc. (PRC), and the Ohio Environmental Protection Agency (OEPA) on March 10, 1992. The reconnaissance was performed on behalf of the United States Environmental Protection Agency (U.S. EPA), to further evaluate the Morton facility (formerly Carstab Corporation) as a potential candidate site for the National Priority List.

Based on discussions during the reconnaissance visit, PRC requests that Morton provide the following items:

- 1) A copy of all available analytical data for water collected in the existing ground-water collection system (french drain and pumping well)
- 2) Information regarding sample location(s), dates, frequency, collection methods and analytical methods (for samples from the ground-water collection system)
- 3) The most current facility map that indicates the site layout, property lines, and the location/depth of underground utilities (including the sewers, piping, and ground-water collection system)

PRC appreciates your continued cooperation in this matter. If you require additional information please call me at (513) 241-0149.

Sincerely,

Guy D. Montfort
Geologist
